

HVAC Treatment helps eliminate musty odors that can be created by fungus, mold and mildew buildup. Product is sprayed directly into air vent inlets that are generally located under the windshield. The sanitizing product leaves a fresh, clean aroma in the vehicle.

FEATURES AND BENEFITS:

- Removes the Unpleasant Odor Caused by Fungus, Mold, and Mildew in Vehicles' Air Conditioning and Heating Systems
- Treats A/C and Heater Vents
- Cleans Evaporator Vents

SHAKE WELL BEFORE USE. DIRECTIONS:

Remove the cover to expose the cabin air filter. Remove the used filter from the evaporator case or holder and discard. Spray HVAC Treatment evenly onto the inbound side of the new cabin air filter. Reinstall Cabin Filter and cover. Start vehicle and let it run at idle. Set fan control speed setting to high. Turn recirculation mode on. Spray remainder of product directly into the AC Heating vents. Let vehicle run for 5 minutes.

SPECIFICATIONS:

Product No.: PS1007
Net Weight: 6oz (170g)
Case Quantity: 12 each
