

DIESEL FUEL INJECTOR CLEANER + CETANE BOOSTER

Diesel Fuel Injector Cleaner + Cetane Booster is a premium quality fuel treatment which boosts the performance and stability of any diesel fuel it is added to. Diesel fuel treated, yields maximum engine performance, fuel economy, emissions reduction, wear protection, and fuel storage stability, for all types of diesel engines. Lifts the cetane value of the base fuel by 3 to 6 numbers, which greatly improves combustion, increases performance and power, and reduces emissions. The lubricity agent prevents wear of fuel pumps and fuel injectors. Contains a powerful detergent package which both removes and prevents carbon build up on injectors and in the combustion chamber and in the diesel particulate filter. In addition to all that, contains anti-oxidant fuel stabilizer to prevent oxidation and fuel break down during prolonged storage or down times.

FEATURES AND BENEFITS:

- Cleans dirty fuel injectors including High Pressure Common Rail (HPCR) injectors.
- Boosts cetane 3 to 6 numbers. Engines run smoother with less power lag and faster cold starts
- Decreases fuel consumption up to 8%. **Saves on fuel costs.**
- Boosts power. Reduces need to downshift during high-load conditions.
- Contains maximum fuel lubrication. Protects fuel injectors and pumps against accelerated wear from Low and Ultra Low Sulfur Diesel (ULSD) fuels.
- Prevents thermal/oxidative breakdown of diesel fuel. Protects against sludge formation that plugs fuel filters and injectors.

SPECIFICATIONS:

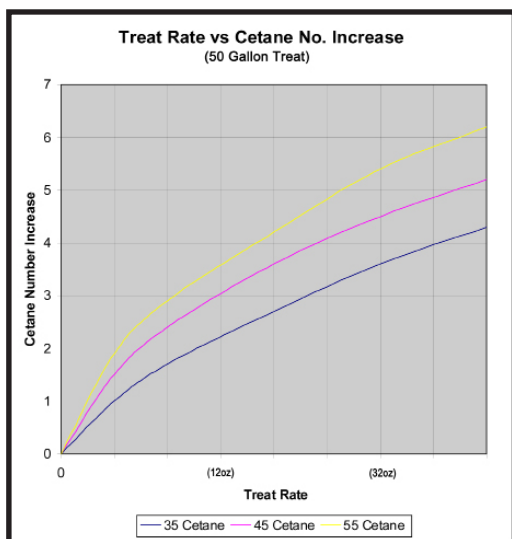

Product No.: PS5402

Net Weight: 11 oz (325 mL)

Case Quantity: 24 each

Cetane Boost

Diesel Fuel Injector Cleaner+Cetane Booster contains a special additive which, when blended into typical quality diesel fuel, raises its cetane value by 3 to 6 numbers. Increased cetane value leads to better and more complete ignition of the fuel, resulting in increase in felt horsepower, better fuel economy, and reduced emissions.

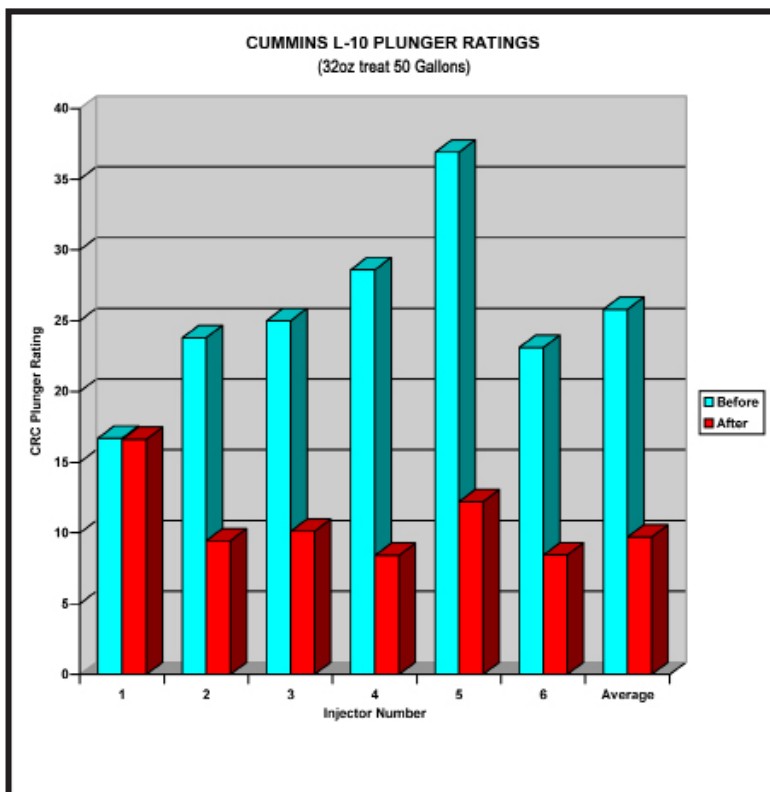

Fuel Lubrication

Diesel Fuel Injector Cleaner+Cetane Booster contains a lubricity agent which compensates for the loss of lubricity caused by Ultra Low Sulfur Diesel fuel requirements. This lubricant contains no sulfur and preserves the ULSD requirement of less than 15ppm sulfur in the fuel, while providing excellent protection against wear in fuel pumps and fuel injectors.

Directions: For DIESEL engines ONLY. Add entire contents to fuel tank. One bottles treats 30 gallons of diesel fuel.

Fuel Injector Cleaning

Diesel Fuel Injector Cleaner + Cetane Booster provides injector-cleaning additives to remove and prevent carbon deposits on fuel injectors and in the combustion chamber. It protects high pressure direct injection systems and helps boost fuel economy and engine performance.
