

SYNTHETIC TRANSFERCASE MANUAL TRANSMISSION FLUID

Synthetic Transfer Case & Manual Fluid is a fully synthetic gear and transmission lubricant with unique frictional properties and superior anti-wear protection. It was developed for applications in Europe, North America and South America; meeting current and future OEM requirements for commercial vehicles. Our advanced formula improves pitting performance resulting in longer component life. It significantly lowers axle running temperatures compared with alternate technologies to improve axle efficiency of product quality.

FEATURES AND BENEFITS:

- Fully Synthetic Formula for Manual Transmissions
- Transfer Cases Requiring ATF or GL-1 & GL-4 Gear Oils
- Superior Anti-Wear & Extreme Pressure Protection

Directions: Fluid Exchange Service: Apply parking brake and hook up fluid exchange machine. Follow operating instructions from equipment manufacturer. Pour entire contents of bottle into machine and start service.

SPECIFICATIONS:

Product No.: PS65056

Net Weight: 64oz (1.89 L)

Case Quantity: 8 each
