

Synthetic Power Steering Fluid (green-colored) is formulated with premium synthetic base oils and a shear-stable viscosity index improver for excellent performance at both high and low temperatures. This valuable product conditions seals, extending the power steering system's longevity. The carefully formulated fluid is blended with a detergent package that keeps components clean as well as provides protection against rust, oxidation, foam and wear. Use Synthetic Power Steering Fluid where synthetic power steering fluid is recommended, or as an upgrade to conventional power steering fluids (except Honda and Acura).

FEATURES AND BENEFITS:

- Premium Full Synthetic Formula
- Premium Alternative to Standard PSF in Most Makes & Models
- Provides Excellent Low-Temperature Performance
- Compatible with Electric Power Steering Systems
- Excellent Oxidation Stability for Resistance to Fluid Breakdown

Directions : Follow instructions for equipment use. Add contents of this bottle to power steering system. Start engine and turn steering wheel and lock in both directions. Repeat until all contents have been used. Check for safe levels and do not overfill.

SPECIFICATIONS:

Product No.: PS98066

Net Weight: 64oz (1.89 L)

Case Quantity: 8 each
