**Section 4 - First Aid Measures:**

First responders should wear clothing appropriate for industrial exposure in accordance with local codes. At a minimum, all exposed skin should be covered, and latex gloves and eye protection meeting ANSI Z87 or CSA Z94.3 should be worn. First responders should avoid contact with spilled material. Spills of this material present a slip hazard. If smoke, fumes, or airborne mist is present, first responders should use organics respirator or self contained breathing apparatus.

**IF SWALLOWED:** Get immediate medical attention. Call poison control center.

**IF INHALED:** Remove affected person to fresh air and make comfortable for breathing. Get immediate medical attention.

**IF IN EYES:** Rinse eyes with water. Get immediate medical attention if irritation persists.

**IF ON SKIN:** Wash skin with cool water. Get medical attention if irritation persists.

**IF ON CLOTHES:** Do not allow skin contact with contaminated clothing. Remove contaminated clothing and wash before re-use.

**IF EXPOSED:** Contact physician if you feel unwell.

**Most Important Symptoms ACUTE:** Respiratory effects, vision effects. **DELAYED:** Dermatological effects.

Indication of Immediate Difficulty breathing, dizziness, extreme drowsiness, eye irritation, loss of vision, skin rash.  
Medical Attention

**Section 5 - Fire Fighting Measures:**

Flash Point: &gt;93C

**Hazardous Decomposition Products** Byproducts of combustion include carbon dioxide, carbon monoxide, oxides of sulfur, oxides of nitrogen, and heavy, acrid smoke.

**Appropriate Extinguishing Media** Avoid spraying water jet on burning hydrocarbon liquids as this may spread the fire. Use dry chemical or foam extinguishing media.

**Specific Fire Hazards** Fire fighters must be protected from smoke with self contained breathing apparatus. Heavy smoke may obscure vision. Smoke may contain oxides of carbon, nitrogen, sulfur, and chlorine.

**Special Protective Actions** Use water spray to cool exposed containers.

---

**Section 6- Accidental Release Measures:****Personal Precautions**

Spills present a slip hazard. Extinguish/disconnect possible sources of ignition near spill. Ensure adequate ventilation of fumes from affected area. Remove unnecessary personnel from area around spill. Prior to cleaning up, don protective gear including chemical and hydrocarbon resistant outer layer, latex or rubber gloves, rubber boots, and eye protection. Emergency responders should wear chemical and hydrocarbon resistant gear.

**Environmental Precautions**

Small spills may be wiped up with rags. For spills >10 litres- if possible to safely do so, contain the spilled material using diatomaceous earth and/or absorbent pads. Dike drains and prevent material from entering sewers, ditches, drains, or water courses. Place absorbed material into sealed storage containers and consult an environmental expert for proper disposal measures. Immediately report any discharges that escape containment to the local environmental authority or fire department.

**Methods for Cleaning Up**

Absorption with diatomaceous earth and/or absorbent pads is best. Do not use vacuum. Do not wash hydrocarbon or chemical spills away into sewers or drains. Use proper disposal methods for spent absorbents and contaminated rags or clothing.

---

**Section 7- Storage and Handling:****Precautions for Handling**

Read and understand entire Safety Data Sheet prior to handling. Wear all appropriate protective gear listed in section 2 above prior to handling. Handle with care to avoid spillage.

**Methods for Safe Storage**

Store only in original containers. Store containers indoors away from heat and flames. Store in secure location with good ventilation. Keep container sealed when not transferring product. Protect from rain and extreme cold. Avoid storage of hydrocarbons near strong mineral acids or materials marked 'Oxidizer'.
